

CIDM 6355 Section 70 Data Mining Methods

Fall 2026

Dr. Liang (Leon) Chen

Class Days/Times/Location or Other Format: Class is taught online.

Office Location: Classroom Center 208-F

Office Hours: 10:00 AM – 2:30 PM Wednesday & Thursdays, and by appointments.

Office Phone: 806-651-2469 (If your phone call is not answered, please leave a voice message and I will reply to you at my earliest convenience, usually within 8 hours during the weekday daytime)

Email: lchen@wtamu.edu (This is the best way to contact me, and you are expected to receive my reply within 8 hours during the weekday daytime, so please check your buff email and WT class announcement regularly)

Social Media: [Keep up with the latest happenings of the Engler COB.](#)

Terms of Use

A student's continued enrollment in this course signifies acknowledgment of and agreement with the statements, disclaimers, policies, and procedures outlined within this syllabus and elsewhere in the WTClass environment. *This Syllabus is a dynamic document. Elements of the course structure (e.g., dates and topics covered, but not policies) may be changed at the discretion of the professor.*

WTAMU Paul and Virginia Engler College of Business Mission Statement

The Paul and Virginia Engler College of Business at West Texas A&M University is dedicated to delivering a transformative and impactful business education grounded in leadership, citizenship, and innovation. This commitment is brought about through exceptional teaching, enriched by scholarly inquiry, and supported by dedication to professional service.

Learning Objectives of the WTAMU Paul and Virginia Engler College of Business Programs

The Paul and Virginia Engler College of Business (PVECOB) at West Texas A&M University (WTAMU) seeks to prepare students in the Bachelor of Business Administration (BBA), Master of Business Administration (MBA), Master of Accounting (MAcc), Master of Science in Computer Information Systems and Business Analytics (MSCISBA), Master of Science Finance and Economics (MSFE) and the Master of Science in Strategic Human Resource Management (MSSHRM) degree programs for careers in business and to foster their professional

growth and advancement via key learning goals and objectives.

The learning objectives of the Paul and Virginia Engler College of Business are as follows:

- Leadership
- Communication
- Critical Thinking
- Business Integration
- Core Business Knowledge
- Global Business Environment
- Business Ethics and Corporate Governance

Engler Edge

Our business programs are designed to give students the “Engler Edge”, a competitive advantage modeled after the success of Paul Engler, with the following three core competencies:

- refined business acumen,
- bold leadership,
- and digital readiness

Course Description

Study and application of concepts and techniques related to management and usage of data, online analytical processing, and data mining concepts, tools and techniques. Principles of data analysis, classification, categorization, and sampling in support of business intelligence operations.

Course Objectives

This course is designed to:

- provide students with a comprehensive understanding of data mining concepts, theories, terminology, algorithms, and processes, as well as their relationships to machine learning and artificial intelligence (**knowledge**);
- equip students with popular and useful data mining and AI-assisted tools, such as Altair RapidMiner AI Studio and R, through hands-on lab assignments (**abilities**);
- develop students’ analytical thinking and skills in problem formulation, data identification and preparation, data analysis, model evaluation, interpretation, and communication of analytical results (**skills**);
- motivate students to explore advanced and emerging topics in data mining, machine learning, and artificial intelligence, and to continue developing their analytical knowledge and skills in various business and organizational settings (**further development**).

Upon completion of this course, students are expected to be able to:

1. CLO1: Explain and evaluate major data mining concepts, algorithms, processes, and their relationships to machine learning and artificial intelligence (AI).
2. CLO2: Formulate data-driven problems and prepare appropriate data for analysis, including data cleaning, transformation, feature engineering, and treatment of missing values and outliers.
3. CLO3: Apply and compare supervised and unsupervised data mining techniques to complex data sets using tools such as Altair RapidMiner AI Studio, R, and other appropriate analytical technologies.
4. CLO4: Evaluate, interpret, and refine data mining and machine learning models using appropriate validation methods, performance metrics, and business or organizational criteria.
5. CLO5: Use generative AI and other AI-assisted tools effectively and responsibly to support data analysis, coding, model interpretation, and documentation while critically evaluating AI-generated outputs and considering issues such as bias, privacy, explainability, and reliability.

6. CLO6: Communicate and apply data mining and AI results effectively by translating analytical findings into actionable recommendations for technical and nontechnical audiences.

Map from COB Learning Objectives to Specific Course Objectives

Course Learning Objectives	AACSB PVECOB Learning Objectives	Assessment Plan
CLO1: Explain and evaluate major data mining concepts, algorithms, processes, and their relationships	Core Business Knowledge	Quiz, Homework and Exam
CLO2: Formulate data-driven problems and prepare appropriate data for analysis	Critical Thinking	Quiz, Homework, and Exam
CLO3: Apply and compare supervised and unsupervised data mining techniques	Critical Thinking	Homework and Exam
CLO4: Evaluate, interpret, and refine data mining and machine learning models	Critical Thinking	Homework and Exam
CLO5: Use generative AI and other AI-assisted tools effectively and responsibly	Core Business Knowledge	Homework and Exam
CLO6: Communicate and apply data mining and AI results effectively	Communication	Homework and Exam

Course Materials (Including text, calculator, internet connectivity, software, virtual programs, etc.)

Books

1. Required: "Data Mining for the Masses: with implementations in RapidMiner and R", Matthew A. North (N for abbreviation). The third edition (ISBN-13: 978-1727102475; year of publication: 2018) is preferred and the second edition (ISBN-13: 978-1523321438; year of publication: 2016) is acceptable.
2. Recommended: "Data Mining Techniques: For Marketing, Sales, and Customer Relationship Management", 3rd edition, Gordon S. Linoff, Michael J. A. Berry, ISBN-13: 978-0470650936, 2011 (L&B for abbreviation).
3. Optional: "An Introduction to Statistical Learning (with Applications in R or Python)". The 2nd edition, Gareth James, Daniela Witten, Trevor Hastie, Robert Tibshirani, and Jonathan Taylor, Springer, 2023. Available for free via [this link](#).
4. Optional: "Data Science for Business: What You Need to Know about Data Mining and Data-Analytic Thinking". 1st edition, Foster Provost and Tom Fawcett, O'Reilly Media, Sebastopol, CA, ISBN-13: 978-1449361327, 2013 (P&F for abbreviation).

Software

1. R Studio Desktop (available at <https://www.rstudio.com>) and R (available at <https://www.r-project.org/>). For more details about using R, please check our DataCamp course: Introduction to R.
2. Altair RapidMiner AI Studio. Please follow the instructions posted on Canvas to download and install it.
3. Microsoft Excel 2010 or above (WT students can install Microsoft Office for free via [this link](#)).

4. Any other software that may be used throughout this semester as complementary tools.

Others

1. DataCamp: An invitation link has been sent to your WT email address. Please follow the instruction to join our class group on DataCamp. You will be required to complete some courses or chapters on DataCamp as a partial fulfillment of a learning activity or assignment.
2. PPT Slides, videos, lab instructions, and any other materials, which will be posted on WT Class.

Course Grading Policies

Your performance in this course is evaluated by the following three components:

- Learning Activities (28%): 7 learning activities such as online discussions and completing the lab without homework assignments, with 40 points each ($40 \times 7 = 280$ points).
- Quizzes (12%): 4 timed quizzes with 30 points each ($30 \times 4 = 120$ points).
- Homework Assignments (30%): 3 homework assignments, with 100 points each ($100 \times 3 = 300$ points).
- Exams (30%): 2 individual exams with 150 points each ($150 \times 2 = 300$ points)

Your final letter grade will be assessed based on the following point accumulations:

- Letter grade of "A": 90% (900 points) or higher
- Letter grade of "B": 80% (800 points) up to, but lower than 90% (900 points)
- Letter grade of "C": 70% (700 points) up to, but lower than 80% (800 points)
- Letter grade of "D": 60% (600 points) up to, but lower than 70% (700 points)
- Letter grade of "F": lower than 60% (600 points)

Attention: Discussion about grading is welcome within a week after the grade is published. After that, no argument or discussion will be accepted.

Course Assignment, Examination, and or Project Policies

This course emphasizes practice and active engagement, requiring significant time commitment to ensure a thorough understanding of the material. It is recommended you allocate at least **10** hours each week exclusively for this course. This time should be dedicated to various course components, including:

- Assigned Readings: Completing the required readings to gain a solid foundation of the course material and enhance your understanding of key concepts.
- Quizzes/Exams: Allocating time to reviewing the course material and successfully completing quizzes/exams to assess your comprehension and reinforce your learning.
- Lab Sections: Participating in lab sections to apply the theoretical knowledge gained in the course, working with analytics software or conducting practical exercises to develop practical skills.
- Homework: Devoting time to completing homework assignments, which are designed to sharpen your analytical skills and reinforce the concepts covered in the course.

- Online Participation: Actively engage in online discussions, forums, and collaborative activities, contributing your thoughts, asking questions, and interacting with your peers.

By setting aside approximately 10 hours per week for these activities, you can ensure that you have enough time to engage fully with the course content, participate actively, and complete the required assignments. This allocation of time is meant to support your learning process and help you achieve success in the course.

Learning Activities

Learning activities foster active learning, critical thinking, and a deeper understanding of the course material. It is essential to engage in these activities as they contribute to your overall learning experience and may be considered in the assessment of your progress and final grade. Be sure to adhere to any guidelines or deadlines provided by your instructor for successful completion of these learning activities. Learning activities in this course encompass various tasks and assignments that promote active participation and engagement. These activities may include:

- Lab Exercises: The instructor may assign specific lab activities designed to reinforce and apply the concepts covered in the course. You are asked to complete them within specified deadlines.
- DataCamp Courses: The instructor may assign relevant courses/chapters on DataCamp to reinforce and apply the concepts covered in the course. You are asked to complete them within specified deadlines.
- Online Discussions: Active participation in online discussions is encouraged. This involves sharing your thoughts, asking questions, and responding to your peers' contributions. It allows for the exchange of ideas, perspectives, and collaborative learning.

Late submissions for learning activities are not allowed without the instructor's approval. Any late submission will automatically receive a score of zero.

Quizzes

Quizzes are used to check and improve your understanding of course materials, including PPT slides and assigned readings, which are posted on WT Class. Quizzes are open books, open slides, and open notes. Four quizzes will be conducted throughout the semester. It is your responsibility to check and complete online quizzes on time. If you miss the deadline for a quiz, you will receive a zero point. Students must complete each quiz **individually**. Students are **NOT** allowed to share or discuss any quiz questions when the quiz is still active. After the due time of each quiz, the answers to each question will be provided. Therefore, there will be no “make-up” opportunities for quizzes and late submissions will be assigned to a zero point. Even though a student misses the deadline of a quiz (i.e., receiving a zero point), s/he still has to complete the missing quiz in order to get access to the next quiz.

You may take each quiz up to 2 times before the deadline, but your grade is the **higher** of the two attempts. After your first attempt, you can view your score on each question and then you can decide whether or not you want to retake it. In your second attempt, questions and answers may be displayed differently. For calculation questions, you may get different numbers in your second attempt. Therefore, read the questions and answers carefully in each attempt.

Quizzes typically consist of multiple-choice, multiple-answer, true/false, and calculation questions. In multiple-choice or true/false questions, there is only one correct answer, resulting in either a zero or full point for that

question. In multiple-answer questions, there is at least one correct answer, and selecting a wrong answer or missing a correct answer may decrease your grade for that question.

Homework Assignments

Homework assignments will be essential for successful completion of the course and develop your data mining skills. In total, there are three homework assignments for this course. It is your responsibility to check homework assignments posted in WT class at least once every week. Homework assignments must be completed **individually**. Copying someone else's answers will not be allowed, nor having someone else do your assignments for you be allowed. It is important that every student must work on homework individually unless stated otherwise, and they must turn it in on time. I accept late assignments up to one calendar day late. Assignments submitted after the deadline but less than one day late will get a late penalty of 20%. Assignments that are more than one day late will **NOT** be accepted and a zero will be assigned for that assignment grade. **Identical homework** will not be accepted and as required by the university policy, the case will be reported to the university authority for necessary action. Please note that identical homework means identical algorithms or identical descriptions or identical solutions, etc. Copying solutions from any web site will be regarded as cheating and the case will be reported to the university authority. Submitted work must be presented in a **professional format**.

Homework assignments are based on lab sections, which involve analytics software. Please start each homework earlier (do not wait until the last day) to clear up any technical obstacles or problems. If a homework assignment requires you to take a few screenshots, you must follow all the requirements to provide reliable screenshots (typically with date and time on them); otherwise, a penalty of up to 50% of your grade on the homework will be applied.

Exams

Examinations are designed to assess your comprehension of the course material covered. There will be two exams throughout the course. In addition to the assigned readings, the exams will encompass any topics discussed in class and any presentations made up until that point. Exam 1 will cover Classes 1-6 primarily, while Exam 2 will focus on Classes 8-11. However, it's important to note that knowledge is cumulative, so Exam 2 may also include some content from Classes 1-6.

Both exams are considered open book, open slides, and open notes. You will have only one attempt for each exam. It is essential to emphasize that these exams are **individual** assessments, meaning collaboration with others or sharing any information regarding the exam with anyone else is prohibited. Additionally, any discussion related to the exam during the exam period is not allowed. If you have any questions or concerns about the exam, please direct them to the instructor.

It is mandatory to complete each exam before the specified deadline; failure to do so will result in a score of zero. There is no make-up exam provided. However, if you encounter an emergency or are unable to take the exam due to unforeseen circumstances, it is crucial to notify the instructor prior to the exam's commencement.

Classroom Conduct

Students should use their WT Buff emails to communicate with the instructor. When sending an email to the instructor or another student in our class, please follow golden email etiquette rules:

- Consider the purpose of your email.
- Include a clear subject matter, and don't shout.
- Always use an appropriate greeting (Don't use laid-back, colloquial expressions such as "Hi" or "Hey" without appropriately addressing the recipient's name; however, if you are writing in a chain of emails where the context has already been established in a prior email or even by phone, then it's fine to write with no greeting).
- Reply in a timely fashion (always reply within 24 hours).
- Always spell check.
- Include a signature block.
- Know that people from different cultures speak and write differently.
- Don't hit reply all or CC everyone.

Our course includes discussion boards and other opportunities to collaborate with and provide feedback to fellow participants. Our Learning Community offers space for participants to extend their conversations with course-takers from across the country. Maintaining appropriate etiquette for online forms of communication—or netiquette—is crucial to ensuring that these discussion forums offer a rich learning experience for all participants. Participants in the Course are asked to kindly follow **six norms for proper netiquette**:

- **Actively participate.** The Course experience is more enriching when it includes a greater number of voices and perspectives. By actively participating, course-takers have an opportunity to engage in discussions that further their understanding of different practices and prepare them to effectively implement what they have learned in their own work.
- **Read and respond to the discussion threads.** The Course is designed to be taken in cohorts because research shows that learning is enhanced by engaging in meaningful discussions. A discussion does not take place by solely reading and responding to the initial prompts, but rather by reading other course-takers' posts and providing feedback, offering encouragement, and sharing relevant resources.
- **Embrace the diversity among course-takers.** Our participants belong to a community of learners that benefits from the exchange of diverse perspectives and experiences. We expect that all course-takers are respectful of these differences.
- **Be timely.** Research shows that discussions are most beneficial when people respond to one another in a timely manner. We ask that you do your best to stay on the same schedule as your peers to maximize learning for all course-takers.
- **Be specific.** We encourage you to offer specific evidence from the videos or your own class experiences when posting to the discussion forums. Citing evidence whenever possible not only allows you to effectively support your ideas but also helps paint a picture for your readers, who may have different perspectives or who have had different experiences.
- **Use an appropriate tone and language.** Without nonverbal cues, humor and sarcasm can be mistaken as cold or insulting. Please pay special attention to your use of tone and language before submitting posts in the discussion areas.

DISCLAIMER: This course, including the text, handouts, lectures, and instructor information and responses, is intended for academic purposes only. No aspect of this course is intended or shall be construed as consulting or legal advice.

Course Topics - Tentative Calendar of Readings, Topics, and Due Dates

Class	Start Date	End Date	Topics	Readings	Tasks to Complete
1	8/24	8/30	Course Preparation	Syllabus & Resources in Getting Started Folder	DataCamp Registration Install R/RStudio and Altair AI Studio
			Introduction to Data Mining	Ch. 1 in N Ch. 1 & 3 in L&B Ch. 2 in P&F (optional)	
2	8/31	9/6	Data Understanding, Data Preparation, and AI-Assisted Data Exploration	Ch. 2 & 3 in N Ch. 17 in L&B Ch. 3 in P&F (optional)	Quiz 1 LA1: Data Preparation Practice
3	9/8	9/13	Modeling: Classification and Decision Tree	Ch. 10 in N Ch. 7 in L&B	HW1
4	9/14	9/20	Modeling: Naïve Bayes (NB) & Logistic Regression	Ch. 7 (NB) & Ch. 9 in N Ch. 7 in L&B Ch. 5 in P&F (optional)	HW2
5	9/21	9/27	Modeling: Support Vector Machine and K-Nearest Neighbors (KNN)	Ch. 7 (KNN) in N Supplementary resources	LA2
6	9/28	10/4	Neural Network Models & Model Comparison	Ch. 11 & Ch. 13 in N Ch. 8 in L&B	Quiz 2 LA3: Lab Practice
7	10/5	10/11	Exam 1		
8	10/12	10/18	Clustering, K-Means algorithm, and AI-Based Segmentation	Ch. 6 in N Ch. 12 & 13 in L&B Ch. 6 in P&F (optional)	HW3
9	10/19	10/25	Advanced issues of Clustering	Ch. 14 in L&B Ch. 6 in P&F (optional)	Quiz 3 LA4: Lab Practice
10	10/26	11/1	Association Rule	Ch. 5 in N Ch. 15 in L&B	LA5: Lab Practice
11	11/2	11/8	Text Mining, Natural Language Processing (NLP) & Generative AI/LLMs	Ch. 12 in N Ch. 21 in L&B Ch.10 in P&F (optional)	LA6: Lab Practice
12	11/9	11/15	Data Mining Ethics, Responsible AI & Explainable AI	Ch. 14 in N	Quiz 4

13	11/16	11/22	Data Mining & AI Project: Application, Interpretation, and Communication	Supplementary resources	LA7
14	11/23	11/25	Exam 2		

Note: this tentative schedule is subject to changes, which will be announced in advance; typically, each quiz, homework, and exam will be posted on the start date and due on the end date.

LA: Learning Activity; HW: Individual Homework

Some key dates in the WTAMU Academic Calendar:

- August 27, 2026: Last Day to Add or Register
- September 7, 2026: Labor Day— no classes
- October 30, 2026: Last Day to Drop or Withdraw 5PM (granted grade of X)

WTAMU Paul and Virginia Engler COB Student Code of Ethics

Each student enrolled in PVECOB courses accepts personal responsibility to uphold and defend academic integrity and to promote an atmosphere in which all individuals may flourish. The PVECOB Student Code of Ethics strives to set a standard of honest behavior that reflects well on students, the PVECOB and West Texas A&M University. All students enrolled in business courses are expected to follow the explicit behaviors detailed in the Student Code of Ethics.

Code of Ethics

- Do not use notes, texts, solution manuals, or other aids for a quiz or exam without instructor authorization.
- Do not copy the work of others and/or allow others to view your answers or copy your work during a quiz, exam, or on homework assignments.
- Do not allow other parties to assist in the completion of your quiz, exam, homework, paper, or project when not permitted.
- Do not work with other students on projects or assignments without authorization from the course instructor.
- Properly cite and specifically credit the source of text, graphic, and web materials in papers, projects, or other assignments.
- Do not forge the signature of an instructor, advisor, dean, or another student.
- Provide truthful information for class absences when asking faculty for excused absences or for a make-up for a quiz, exam, or homework.
- Provide truthful information on your resume including work history, academic performance, leadership activities, and membership in student organizations.
- Respect the property, personal rights, and learning environment of all members of the academic community. This includes posting, sharing, and otherwise distributing the course materials outside of this course without expressed permission of the faculty, college, university, or system.
- Live up to the highest ethical standards in all academic and professional endeavors.

Students violating the Student Code of Ethics will be reported to the Dean's office and are subject to penalties described in the West Texas A&M University Code of Student Life, which may include suspension from the University. In addition, a violator of the Student Code of Ethics may become ineligible for participation in student organizations sponsored by the COB and for recognition for College academic honors, awards, and scholarships.

WTAMU Student Resources Link

WTAMU has developed an Academic Study Skills information site to assist students (e.g., study habits, supplemental instruction, tutoring, writing and math skills), which can be found on the [WTAMU Website](#). For WTAMU Writing Center information (for students needing writing assistance, guidance, and feedback), please visit their [Writing Center website](#).

WTAMU faculty, staff, and students qualify to receive a [free license of Office 365](#) for personal use. This program gives you access to the latest versions of Word, Excel, PowerPoint, OneNote, and more to help you in the classroom.

Student Travel Opportunities

In multiple business courses, there may be opportunities for student travel supplemented by student fees. If you have an interest in such opportunities as they become available, please notify a faculty member.

Dropping/Repeating the Course

Should a student decide to drop the course, it is the student's responsibility to be aware of the final drop dates and adhere to the WTAMU Add/Drop policy. Any student participating in the course after the WTAMU posted drop date will be considered active and a grade will be administered at the end of the course for that student. Students are charged a fee for any course attempted for a third or subsequent time at WTAMU other than a non-degree credit developmental course or exempted courses.

Scholastic Dishonesty

It is the responsibility of students and instructors to help maintain scholastic integrity at the University by refusing to participate in or tolerate scholastic dishonesty. Commission of any of the following acts shall constitute scholastic dishonesty. This listing is not exclusive of any other acts that may reasonably be said to constitute scholastic dishonesty: acquiring or providing information for any assigned work or examination from any unauthorized source; informing any person or persons of the contents of any examination prior to the time the examination is given in subsequent sections of the course or as a makeup; plagiarism; submission of a paper or project that is substantially the same for two courses unless expressly authorized by the instructor to do so; submission of a paper or project prepared by another student as your own. You are responsible for being familiar with the University's Academic Integrity Code, as well as the PVECOB Student Code of Ethics listed in this document.

Academic Integrity

All work must be completed individually unless otherwise stated. Commission of any of the following acts shall constitute scholastic dishonesty: acquiring or providing information for any assigned work or examination from

any unauthorized source; informing any person or persons of the contents of any examination prior to the time the exam is given in any subsequent sections of the course or as a makeup; plagiarism; submission of a paper or project that is substantially the same for two courses unless expressly authorized by the instructor to do so. For more information, see the [Student Handbook](#).

Generative AI

Generative artificial intelligence (Generative AI) is a computer-based technology that produces a variety of data, such as pictures, videos, music, or words, which may look or sound like a person made them. Generative AI tools appear to be created by humans because they are derived from deep machine learning routines and large language models based on algorithmic comprehension of materials created by humans. West Texas A&M University recognizes that generative AI presents challenges and simultaneously offers stimulating opportunities in higher education.

The use of generative AI is permitted in this course to help prepare assignments and projects. When submitting work, students must clearly identify any generative AI content in contrast to student contributions (e.g., student citation of prompts, the generative AI platform used, the date the prompts were issued, and related). Using an AI tool without proper attribution qualifies as a violation of academic integrity.

Viewpoints/External Websites Disclaimer

The views expressed in this document, web-based course materials, and/or classroom presentations and discussions are those of the professor and do not necessarily represent the views of West Texas A&M University, its faculty and staff, or its students. Views expressed by students are likewise those of the person making such statements. It is understood and expected that each individual within this course will respect and allow individual difference of opinion.

Neither the professor, the COB, nor WTAMU are responsible for the content of external websites discussed in the classroom and/or linked to via online course materials, emails, message boards, or other means. Referred websites are for illustrative purposes only, and are neither warranted nor endorsed by the professor, COB, or WTAMU. Web pages change frequently, as does domain name ownership. While every effort is made to ensure proper referencing, it is possible that students may on occasion find materials to be objectionable for reasons beyond our control.

Acceptable Student Behavior

Classroom behavior should not interfere with the instructor's ability to conduct the class or the ability of other students to learn from the instructional program (Code of Student Life). Unacceptable or disruptive behavior will not be tolerated. Students engaging in unacceptable behavior may be instructed to leave the classroom. Inappropriate behavior may result in disciplinary action or referral to the University's Behavioral Intervention Team. This prohibition applies to all instructional forums, including electronic, classroom, labs, discussion groups, field trips, etc.

Technology Requirements

All [technological requirements](#) for the successful completion of this course are the responsibility of the student, including access to a working computer and/or to a device with secure broadband Internet connection, data storage and retrieval, and state-of-the-art security. The student is responsible for all technological problems not related to WTAMU, including but not limited to equipment failures, power outages, and internet breakdowns. Furthermore, students are responsible for all necessary technical and operational skills for completing this course, and for being familiar with WTCClass (the Canvas Learning Management System) both in a general sense and in a specific sense as pertaining to this course and any materials stored within. The professor is not responsible for any technical matters related to WTCClass. Students must contact the IT Service Center at 806-651-4357 or itsc@wtamu.edu if they have problems accessing and/or using the WTCClass environment. Students are also encouraged to consult the Student Technology Support Portal at students.wtamu.edu for help with WTCClass.

Physical or Educational Access - ADA Statement

West Texas A&M University seeks to provide reasonable accommodations for all qualified persons with disabilities. This University will adhere to all applicable federal, state, and local laws, regulations, and guidelines with respect to providing reasonable accommodations as required to afford equal educational opportunity. It is the student's responsibility to register with Office of Student Accessibility (OSA) and to contact faculty members in a timely fashion to arrange for suitable accommodations. Contact Information: [Student Success Center](#), CC 106; phone 806-651-2335.

Mental Health and Well-Being

The university aims to provide students with essential knowledge and tools to understand and support mental health. As part of our commitment to your well-being, we offer access to Telus Health, a service available 24/7/365 via chat, phone, or webinar. Scan the QR code to download the app and explore the resources available to you for guidance and support whenever you need it.

Can't scan the code? Learn more and access Telus Health at: <https://www.wtamu.edu/student-support/medical-services/medical-services-mental-health.html>

Title IX Statement

West Texas A&M University is committed to providing a learning, working, and living environment that promotes personal integrity, civility, and mutual respect in an environment free of sexual misconduct and discrimination. Title IX makes it clear that violence and harassment based

on sex and gender are Civil Rights offenses subject to the same kinds of accountability and the same kinds of support applied to offenses against other protected categories such as race, national origin, etc. Harassment is not acceptable.

If you or someone you know has been harassed or

assaulted, you can find the appropriate resources here:

- WTAMU Civil Rights and Title IX Coordinator – VHAC 262, **or** call 806.651.3199
- WTAMU Counseling Services – VHAC 242, **or** call 806.651.2340

- WTAMU Police Department – 806.651.2300, **or** dial 911
- 24-hour Crisis Hotline – 800.273.8255, **or** 806.359.6699, **or** 800.692.4039

For more information, see the [Student Handbook](#)ⁱ.

Evacuation Statement

If you receive notice to evacuate the building, please evacuate promptly but in an orderly manner. Evacuation routes are posted in various locations indicating all exits, outside assemble area, location of fire extinguishers, fire alarm pull stations and emergency telephone numbers (806.651.2300 or 911). In the event an evacuation is necessary; evacuate immediately do not use elevators; take all personal belongings with you; report to outside assembly area and wait for further information; students needing assistance in the evacuation process should bring this to the attention of the instructor at the beginning of the semester.

Copyright

All original content in this document, all web-based course materials (be they text, audio, and/or video), and/or classroom presentations are subject to copyright provisions. No distribution without the express written consent of the author. Students are prohibited from selling (or being paid for taking) notes during this course to or by any person or commercial firm without the express written permission of the professor.

** Syllabus template approved by COB Curriculum Committee August 2026. Annual review of the syllabus is a formal part of the COB continuous improvement process.*
